OMNI CABLE BRINGS IN A FULL LINE OF BELDEN INDUSTRIAL ETHERNET CABLE

Belden makes the best Industrial Ethernet cables in the business, and Omni Cable has a full line of Belden Industrial Ethernet cables stocked nationwide. Commercial Ethernet cables have been used around the world for over 30 years, but with the need for increased control and higher data transmission, the demand for Industrial Ethernet cables is drastically increasing.

Belden's Industrial Ethernet cables maintain reliable performance in an industrial environment due to their extensive testing of their cables. Belden's Industrial Ethernet cables operate in a much wider temperature range, are more resistant to solvents and other chemicals, can be used outdoors, and its bonded pairs help maintain a constant attenuation, increase the length that it can be run, and prove to be more durable in its industrial environment.

Pete Comber, the EVP of Marketing, comments, "With the demands of the market for a more durable and reliable Ethernet cable, Belden's Industrial Ethernet line is the logical choice." Pete also added, "With industrial downtime being your biggest threat, Belden's Industrial Ethernet cables give you the peace of mind knowing that your system is running on the most reliable Ethernet cables in existence."

Omni Cable, an ESOP company, is a master distributor of specialty wire and cable sold exclusively through electric and electronic distribution. Our stocking locations include Philadelphia, PA; Atlanta, GA; Boston, MA; Chicago, IL; Denver, CO; Houston, TX; Los Angeles, CA; San Francisco, CA; St. Louis, MO and Tampa, FL.
