

# Why Purchase Circuit Breakers from OmniCable?

## Availability, Accessibility, Traceability

### AVAILABILITY

OmniCable now sells Siemens circuit breakers in addition to Eaton & Square D to electrical distributors providing them with authorized, safe, and reliable products through a single source. OmniCable is an extension of your warehouse with an extensive inventory of circuit breakers and accessories. Circuit breakers are available 24 hours a day, 365 days a year and shipped the same day.

### ACCESSIBILITY

It is all about safety when purchasing an AUTHENTIC product from an AUTHORIZED source. Unauthorized sources rely on deception and aggressive pricing. Identifying counterfeit products is extremely difficult. They are made with inferior materials, inaccurate manufacturing processes, and without functional or safety testing.

### TRACEABILITY

An authentic product is only sold through an authorized source who can provide full TRACEABILITY. Purchasing products from unauthorized sources significantly increases your risk of receiving counterfeit, altered, tampered, or refurbished products. Unauthorized sources cannot provide traceability.

Don't expose your company to increased RISK and LIABILITY by purchasing suspect products from unauthorized sources. Your business reputation is on the line, so don't put your customers in an unsafe environment and exposing your company to unnecessary liability. Products purchased through unauthorized sources do not carry the factory warranty which leaves the distribution channel open to liability.

OmniCable has signed agreements with Schneider Electric to serve as an authorized genuine source of their circuit breakers for electrical distributors.

# Circuit Breakers

## Line Card

### Applications

Types of equipment where circuit breakers are installed - Commercial Switchboards, Panelboards, Motor Control Centers, and Control Panels/Enclosures. Residential Loadcenters and Meter Centers.

by **Schneider** Electric

#### Miniature Circuit Breakers

QOB Frame (Bolt-on)  
Amperage Range: 10-150

QO Frame (Plug-in)  
Amperage Range: 10-200

QOU Frame (Cable in/out)  
Amperage Range: 10-125

HOM Frame (Plug-in)  
Amperage Range: 10-200

#### Molded Case Circuit Breakers

E-Frame  
Amperage Range: 15-125

F-Frame  
Amperage Range: 15-100

K-Frame  
Amperage Range: 70-250

D-Frame  
Amperage Range: 150-600

LA-Frame  
Amperage Range: 70-400

#### Specialty Circuit Breakers

Motor Circuit Protectors  
Amperage Range: 1.5-1200

500 Vdc Circuit Breakers  
Amperage Range: 30-1200

Photovoltaic (Solar)  
Amperage Range: 50-500

Mission Critical  
J & L Frames  
Amperage Range: 70-600

#### PowerPact™ Molded Case Circuit Breakers

B-Frame  
Amperage Range: 15-125

H-Frame  
Amperage Range: 15-150

J-Frame  
Amperage Range: 50-250

Q-Frame  
Amperage Range: 70-250

L-Frame  
Amperage Range: 125-600

M-Frame  
Amperage Range: 300-800

P-Frame  
Amperage Range: 400-1200

R-Frame  
Amperage Range: 800-3000
